Nphies compliant ready software for the primary care sector

Anytime will help you to grow and manage your primary care practice by delivering the satisfaction and value that help ensure optimal allocation of healthcare resources, all that with a complete Nphies integration that guarantees all the security and efficiency.

**Managing a business is hard.
Managing a healthcare business
is incredibly hard.**

anytime

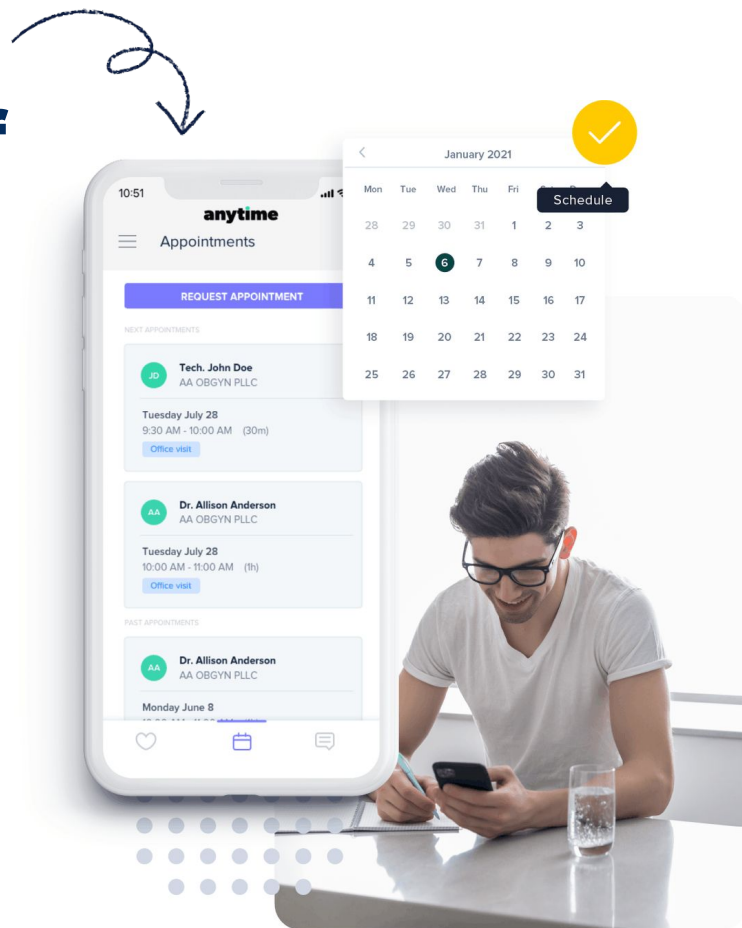

As a healthcare business you have to:

- Comply with regulations
- Treat patients
- Be on top of healthcare best practices
- ... plus everything else a normal business has to do:
 - Grow sales
 - Control costs
 - Manage a brand

Historically, software solutions have been more of a burden than an ally

- Expensive and long implementations
- Hard to use, end up as shelf software
- Lack flexibility to adapt to different scenarios
- Broken processes between marketing, clinical, and financial operations

But, the world has changed...

- Smartphones are embedded in our daily lives
- Social networks and search engines have changed buyers behaviors
- The cloud has dramatically reduced the cost of enterprise software
- Consumers have higher expectations of an application's usability and user experience

**One system to manage all
aspects of your clinic.
Simply.**
