Anytime Chat

Enhance the communication with your patients
WhatsApp is the most used tool globally, but it does not mean that it is the most professional way to communicate with your patients. Take back control of your time and chat with your patients from their health records.

- The doctor's phone number is never displayed.
- A "not available" notification is available for each doctor.
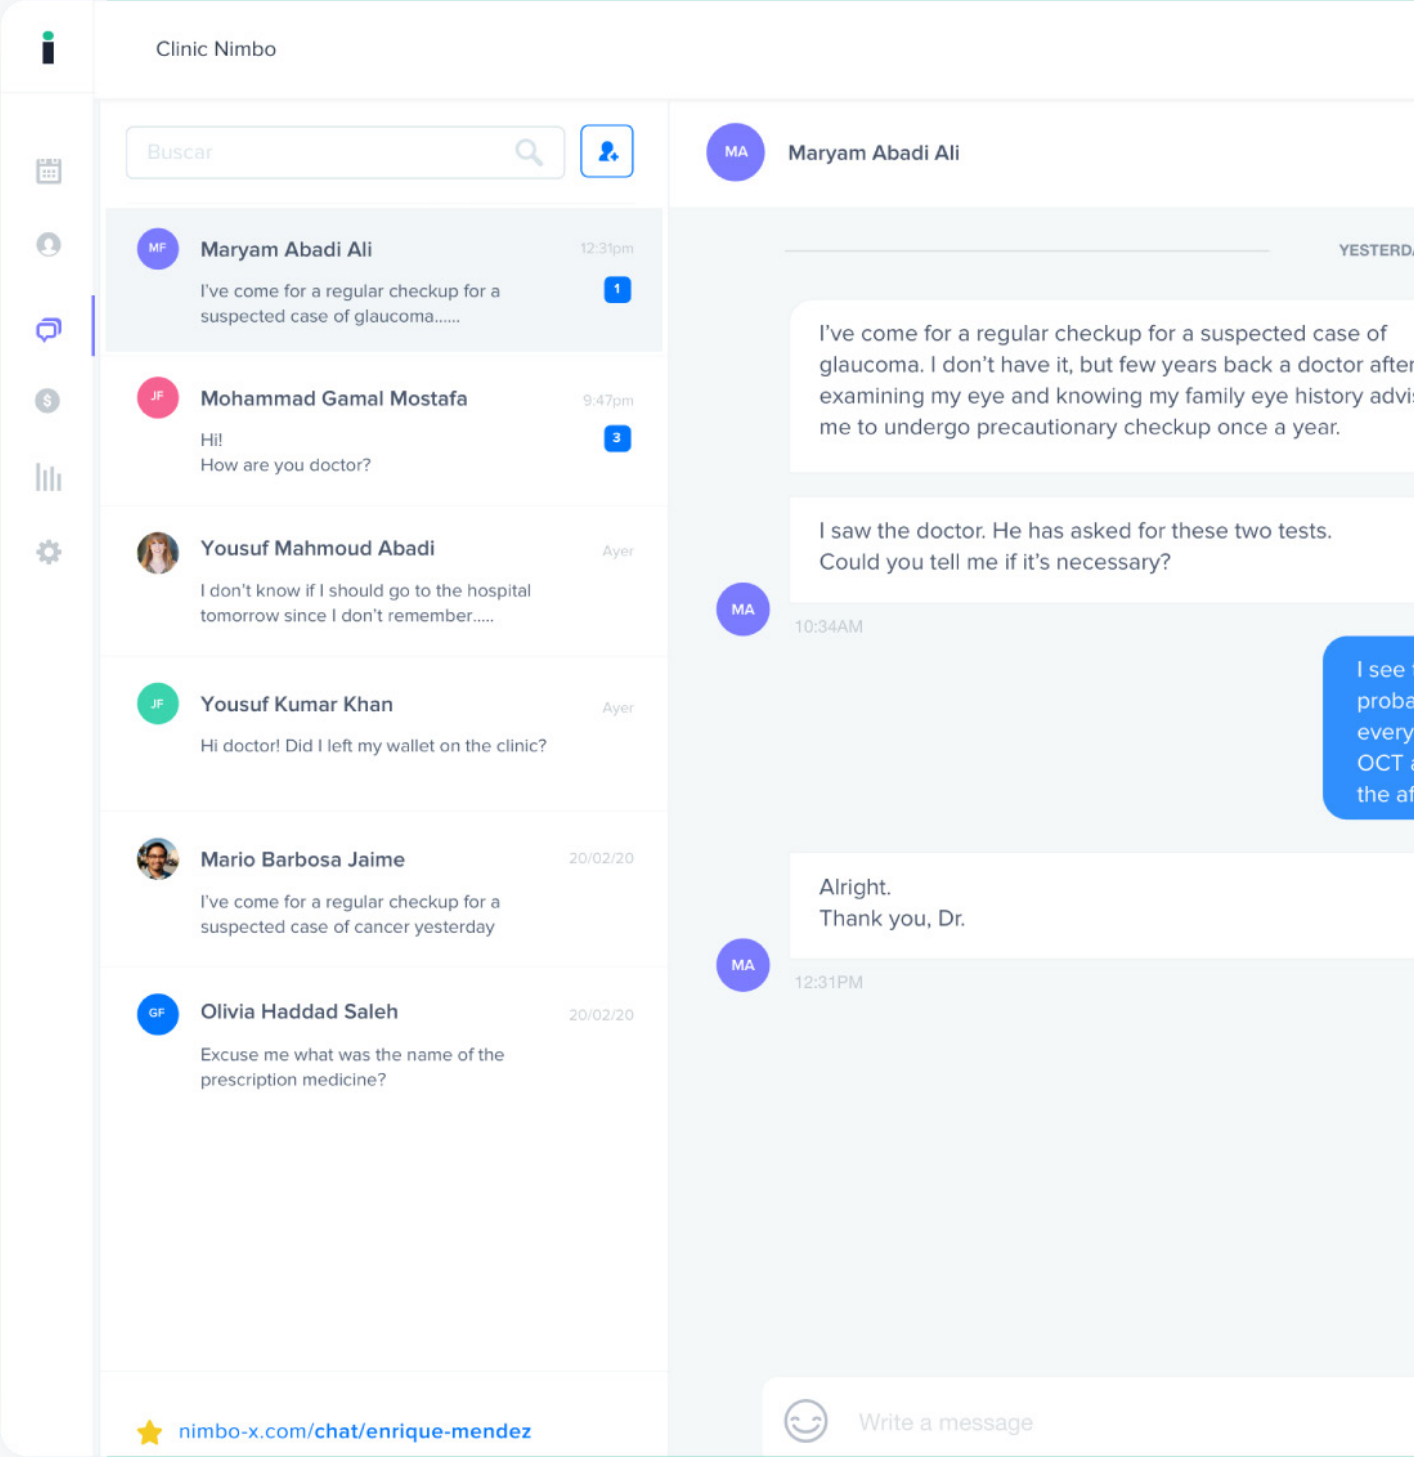

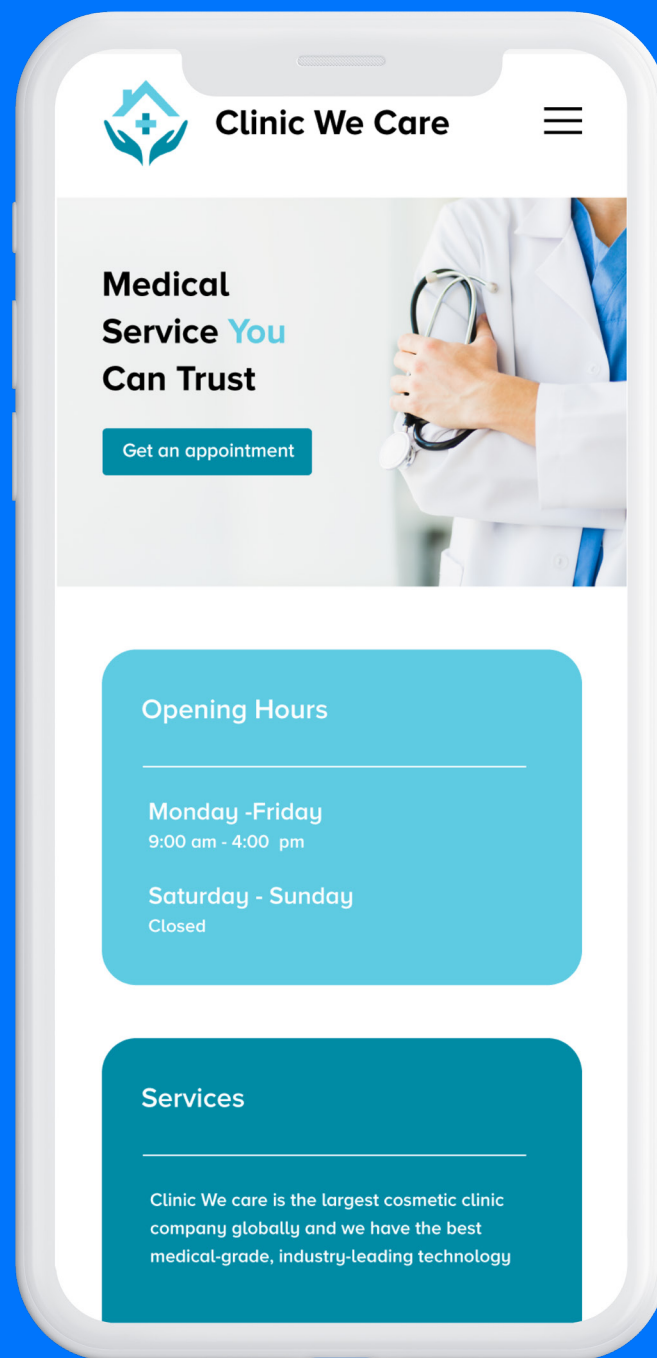

anytime

Anytime
for Patients

A mobile app for your patients to connect with your business
Tell your patients to download the app and offer them direct access to your
medical agenda. Also, they will be able to pre-fill clinical forms for consultations.
Ask your patients to download it. It's free!

- Vital signs, pathological history, and clinical history of each patient on their cell phone.

Anytime Marketing

Anytime Marketing can be integrated with:
Mailchimp is the most widely used platform for mass mailing in the world.

Attract new patients and manage your digital reputation.
80% of patients start their search on the internet. Anytime Marketing helps you grow your online presence so that when they search, they find you.
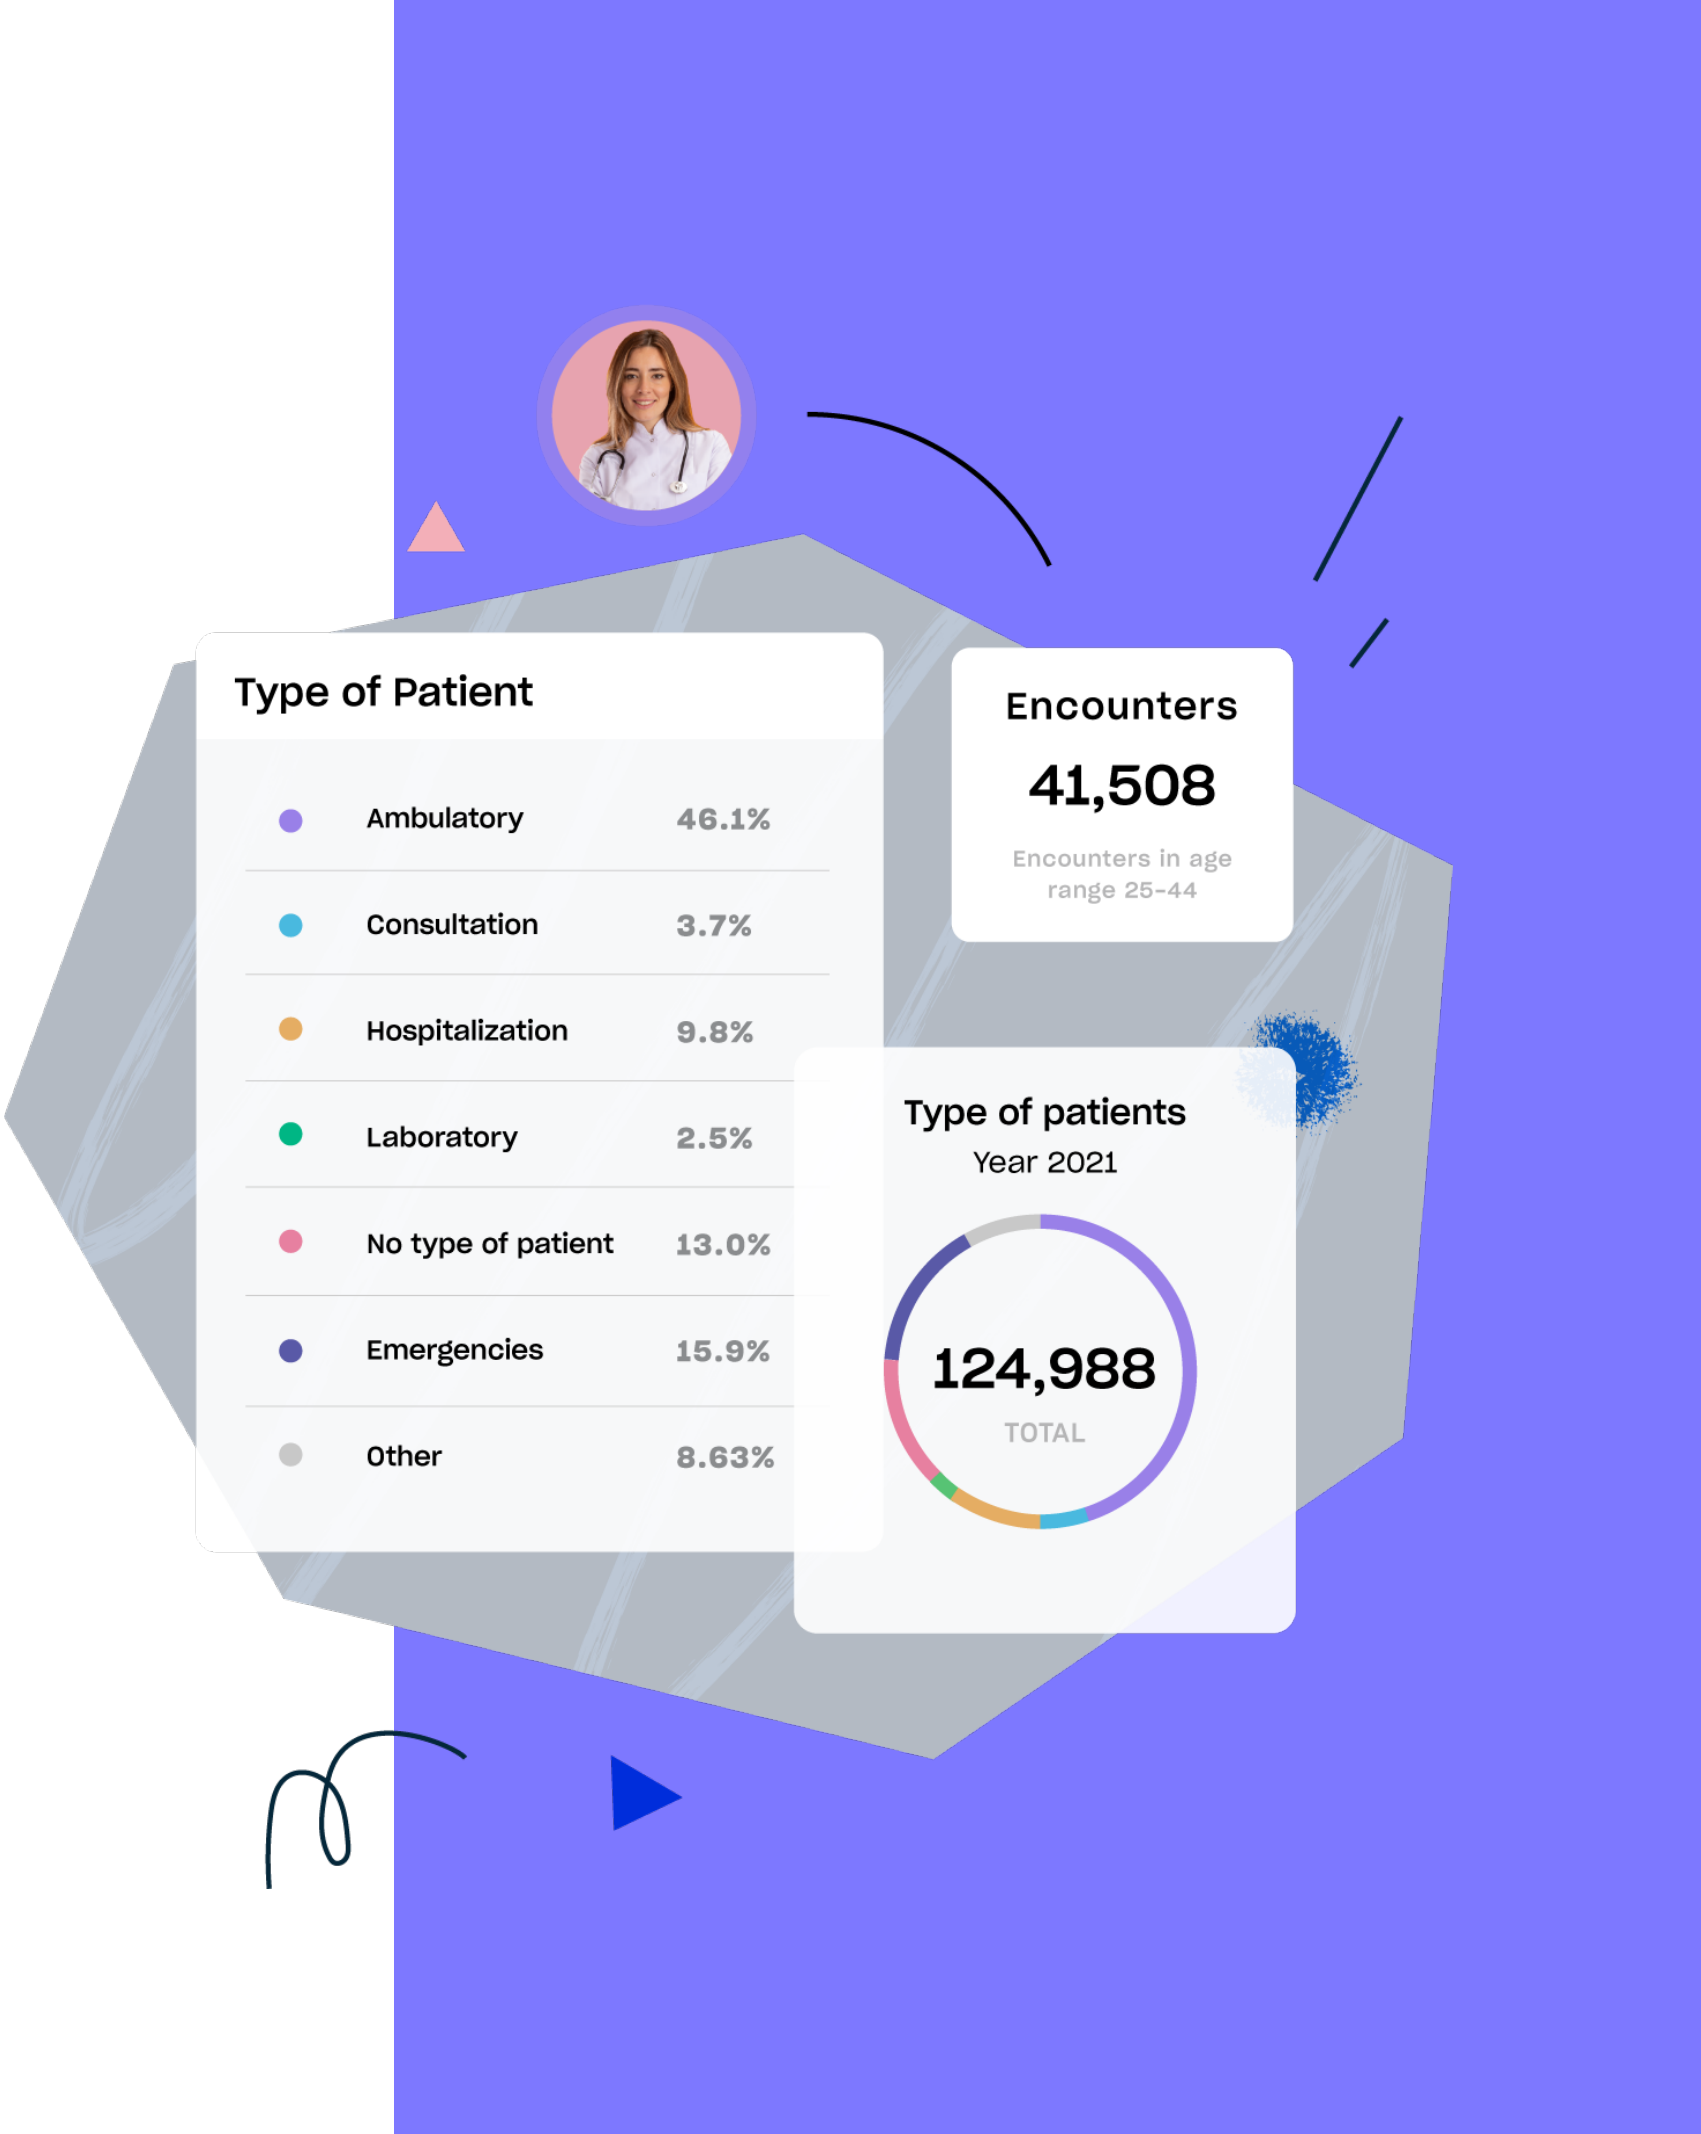

Estela

Get the most out of clinical information.
Meet Estela - The first medical data warehouse for health businesses.
Estela is our data suite that makes it possible to know in real-time and with
absolute precision the data values related to the clinical care that a group of
doctors provides to a universe of patients.
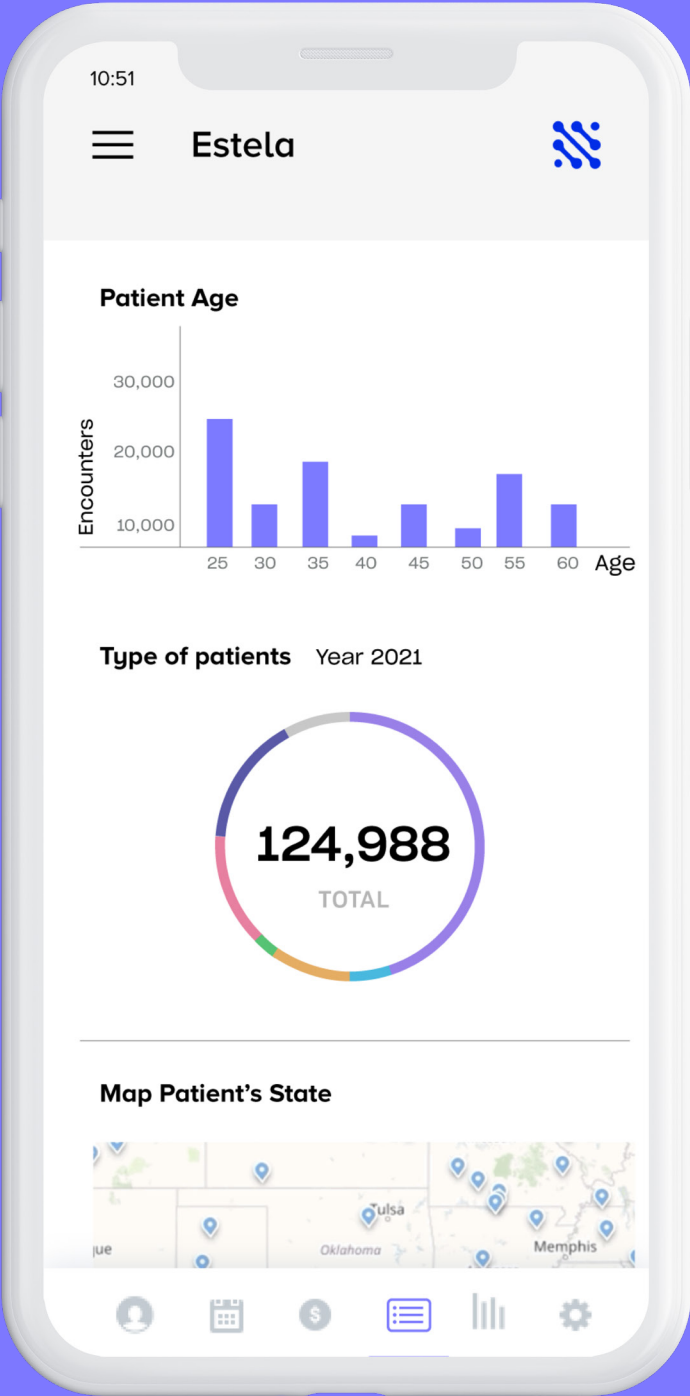

Estela

- No technical knowledge is required to interact with the operation data.

- Gather and visualize the clinical, administrative, and financial data.

- A single truth of information.

- Easily access and view information
